- ▶ Direct access to FPS
- ▶ Link to Autowork workshops
- ▶ 24/7 parts lookup and ordering
- ▶ Web-based Autonet Online
- ▶ Faster responses to enquiries
- ▶ Reduced data entry & fewer errors

| MFG Code | Part No. | Price |
|----------|----------|-------|
| FRA      | *PH2951  | CP    |
| FRA      | *PH2964  | C     |
| Z121     | PP       |       |

Autonet is a suite of applications and solutions designed to enable motor factors and parts suppliers to communicate and trade electronically. By linking directly to the back-end systems of trading partners, it accelerates the communication of business transaction data and, in many cases, provides real-time access to product and price information. Autonet is essentially a translator that enables Autopart to communicate with differing systems using various transaction standards. With support for all major e-commerce protocols, Autonet provides a simple solution that is universally compatible.

| Returned Core | Select                              | Status      |
|---------------|-------------------------------------|-------------|
| 64            | <input checked="" type="checkbox"/> | Not found   |
| 43            | <input type="checkbox"/>            | Alternative |
| 43            | <input type="checkbox"/>            | Alternative |
