## Autopart-driven Online trading solution

Autonet Online is a web-based parts catalogue and shopping basket application that integrates directly with Autopart for seamless online trading

- ▶ Sell components online
- ▶ Receive orders directly in Autopart
- ▶ Integrated parts catalogue
- ▶ VRM vehicle identification
- ▶ Autopart-driven pricing
- ▶ Retail and accounts orders
- ▶ Online payment options
- ▶ Live stock checking
- ▶ Alternative parts prompts
- ▶ Fully rebrandable

Autonet Online is a fully-featured online application that allows motor factors and retailers to quickly and easily sell components online. It integrates directly with Autopart and shares the same pricing and stock databases. All orders placed through Autonet Online are automatically and immediately transferred to Autopart's point-of-sale for processing. Autonet Online features an intuitive interface that guides users through their purchase. The integrated Autocat+ parts catalogue, which uses VRM for vehicle identification, simplifies the selection process and ensures a smooth and efficient transaction.
