

# AUTOPART

## V20

## Software for Motor factors and retailers

Autopart is a feature-rich, Windows-based application offering fully-integrated point-of-sale, stock control and accounting functionality

- ▶ Flexible retail point-of-sale
- ▶ Multi-branch stock management
- ▶ Integrated electronic catalogue
- ▶ Purchase order processing
- ▶ Wholesale sales order processing
- ▶ Integrated ledger accounting
- ▶ Trade, retail and promotional pricing
- ▶ Detailed management reporting
- ▶ Barcode scanning and label printing
- ▶ Fully e-business enabled

Autopart has been designed to meet the specific needs of parts suppliers, wholesale distributors and accessory retailers. Created and developed for the Windows operating system, it provides a wealth of functionality yet remains intuitive and simple to use. Autopart's flexible screen layouts simplify the sales process and promote good customer service. Details such as electronic catalogue, stock availability, alternative products, special pricing and customer sales history are all instantly accessible from point-of-sale, thereby providing counter staff with the necessary information to conduct a smooth and efficient transaction.
