

# Gold standard software solutions for today's Tyre and Fast Fit market

**Large or small? Wholesale or retail?  
MAM has a proven solution to meet your needs**

## Reliable and affordable tyre and autocentre management software

MAM's proven software applications provide a functionality yet remain intuitive and simple to use. We offer fully integrated solutions to manage all of your needs.

**Autopart** Our flagship enterprise management solution for medium to large tyre operations. It will deliver cutting edge, next level benefits to wholesalers, retailers, parts distributors, autocentres and motor factors, whether single or multi branch.

**Autowork** A business management application for smaller single depot operations. Aimed at garages, fast fits, workshops & MOT centres.

**Autocat+** A web-driven electronic parts catalogue and recognised as the market-leading standard. Options can link it directly to VRM lookup and to our core applications.

**Autonet online** A suite of online applications, systems and services for online trading. Solutions are available for buying and selling connectivity and include web interfaces for both B2B and B2C retail e-commerce.
